

## Early remedial education (HFE)

Early childhood education is an early measurement for children from birth up to two years after school entry.

It is aimed for children with developmental disorders as well as for children whose development is endangered. Abnormalities may be appear in the intellectual, linguistic, motorically limited, emotional, social and/ or cognitive development.

Throughout the investigation, preventive and educational support and also get adequate **encouragement**. The children get accompanied and supported in the family context.

The duration of the special needs of the early childhood education depends on the maturity of the child and the requirements of the parents.
